

PRESS INFORMATION

Waldkirchen, December 2023

PARAT sets a higher standard for transporting tools.

A new ergonomic standard has been announced for the mobility of tools.

Waldkirchen, 12.12.2023.

PARAT is a well-known expert in providing transport and storage solutions. They have recently taken a significant step towards innovation by developing an advanced system for ergonomic and safe tool transport. This system is the outcome of extensive development work and user feedback. It will be officially unveiled at the renowned international trade show, Light + Building, in Frankfurt in March 2024.

PARAT offers a range of cases and bags that provide comfort and security during the transport of tools, electrical equipment, or sensitive measuring devices. The well-thought-out design technology ensures smooth handling to prevent over-stressing.

PARAT is a company with a rich history of innovation that offers a wide range of products that consistently set new industry standards. The proven products feature lockable carrying handles and combine lightweight construction with high-strength X-ABS plastic, as well as CP-7 tool holders that ensure maximum quality and user-friendliness. The portfolio also includes castor systems that make mobility effortless..

As both a designer and manufacturer, PARAT provides customizable products, quick implementation of customer feedback, and repair services.

The new transport system combines all the advantages in one: a sturdy frame construction, flexible interior design, ample storage space, and practical, innovative access options without compromising on comfort and ergonomics.

The latest invention by PARAT reflects the company's brand tradition and its characteristic design. From March 2024, the target group can experience PARAT's ongoing efforts to deliver top-notch performance. The smart storage solutions provide added convenience and support in daily work for users from industries like trade and industry as well as mobile professionals from fields such as medicine, sales, and customer service.

Visit PARAT at the Light + Building Trade Show: Hall 12.1, Booth C29.
